Total OpEx – as % of IFRS Revenues

*In line with the continued steady increase in the share of recurring revenues in total revenues, sales expenses directly related to obtaining cloud contracts, such as sales commissions, are deferred (capitalized) as assets and amortized over time. They are not expensed fully in the same period. Such expenses are to be amortized under IFRS 15 during the period in which the relevant revenue is recognized. Since the cumulative effect of this accounting treatment on the previous financial statements was below the materiality level they have not been restated.
